PHYSICIAN FEE SCHEDULE UPDATE

AHCCCS is revising its Fee-For-Service (FFS) Physician Fee Schedule payment rates for dates of service on and after May 1, 2004.

The revision consists of two components. First, the fee schedule rates will be updated based on the Medicare 2004 physician fee schedule (excluding maternity, anesthesia, dental and transportation services). Second, AHCCCS will implement a facility/non-facility rate differential consistent with Medicare.

The facility/non-facility rate structure will assign a reimbursement rate for a given AHCCCS covered procedure code based on the place of service (POS) code for that procedure. AHCCCS' facility/non-facility rate differential will be consistent with the facility/non-facility rate differentials on the Medicare 2004 Relative Value Schedule. AHCCCS definitions for POS "facility" and "non-facility" are the same as those established by Medicare.

The AHCCCS fee schedule and procedure modifiers, incorporating the updates described above, may be accessed on the FTP server by referencing file #02 at <ftp://shareinfo/reference/refer02.zip> following the April 2004 month-end processing. In addition, the fee schedule will be available on the AHCCCS website, located at www.ahcccs.state.az.us. By clicking on the Provider section, you can view the entire fee schedule or groups of procedure codes. Rates are downloadable from the website as text or Excel files, and are searchable by both procedure code and description. The website will be updated in early May.

Encounter Edit Updates**A900/A901**

Due to a recent problem in reported health plan paid amount, the soft encounter error A900, unreasonable health plan paid amount, is being modified to identify significant differences between the AHCCCS fee schedule and the health plan paid amount. It is expected that the A900 error will be changed to hard effective with dates of services on and after October 1, 2004. The A901 error may be changed to hard at a later date.

Z220

A logic error was found in encounter edit Z220 - Prescribing Provider ID Missing or Invalid. The logic error has allowed missing prescribing provider IDs to bypass the edit. Reporting prescribing provider ID on pharmacy encounters is required. The logic error should be corrected soon. Please review your pharmacy prescribing provider ID submissions. Missing prescribing provider IDs will result in pended encounters if not reported. As soon as the logic error has been corrected you will be notified.

Z623

Due to an error, encounters are pending for error code - Z623 (Near Duplicate, Administration and Toxoid State Supplied Modifier). This error code is directed towards the Vaccines for Children Program (VFC). It is not necessary for your staff to correct this pend error. AHCCCS will release these errors in May.
